

ENUGU STATE ELECTRICITY REGULATORY COMMISSION

PUBLIC NOTICE

Sequel to the public announcement from MainPower which stated that EEDC, its parent company, directed the curtailing of power supply to Bands B to E Feeders, and the challenges in vending being experienced by the customers in Enugu State, the Enugu State Electricity Regulatory Commission (the Commission) invited MainPower Electricity Distribution Limited (MainPower) to a meeting on Thursday 7th August, 2025 to ascertain the reasons for the decision to curtail power supply in Enugu State and vending challenges being experienced by customers.

During the meeting MainPower explained that they (MainPower and EEDC) were having difficulties separating Enugu State from the rest of the States in the coverage area of EEDC, which challenge was termed **“code coverage conflicts and related glitches”** but gave assurance that the issue would be sorted out very soon. The Commission, however, mandated MainPower to formally communicate with the customers on vending challenges and efforts being made to resolve it.

As regards the curtailing of power supply in Enugu, and their dissatisfaction with the Tariff Order from the Commission, thereby plunging parts of the state into darkness, the Commission reminded MainPower of the provisions of the Commission’s Business Rules which require that they make a formal petition within thirty (30) days of the Commission’s Order if they were not satisfied with the Order, instead of resulting in curtailing of supply. The petition will enable a public hearing on the Tariff Order to which the outcome will be implemented. The Business Rules is accessible to all stakeholders on the Commission’s website (www.eerc.en.gov.ng).

The Commission is consulting with relevant stakeholders at the state and federal level and will endeavour to apply appropriate regulatory approach in dealing with this issue to ensure that developers, service providers, customers and Ndi Enugu get the full benefit of the evolving subnational electricity market in the State. We will also ensure that MainPower recovers sufficient revenue that covers their **efficient costs of doing business in Enugu State** plus a fair return on capital invested, as provided in section 34 (2)(b) of the Enugu State Electricity Law 2023.

**SIGNED:
THE COMMISSION**
